Profile

I am a Web Developer with a huge passion for Frontend technologies, JAMStack, and some backend tools like Express.js, Nitro, Bun, or T3 Stack, my goal is to deliver world-class user interfaces with remarkable usability. Also, my best strength is my openness to new technologies and my ability to dive into new projects and get to understand them quickly.

Work Experience

React & TypeScript Engineer (COMPLEX NTWRK), Baires Dev ⧉

04/2025 – 11/2025 | Santo Domingo, Dominican Republic

Worked on the E-commerce team for COMPLEX, fixing bugs, implementing new features, and overall improving user experience. The daily tools used were React, Hydrogen, Typescript, Shopify, Sanity, etc.

Main Fullstack Developer, VC Biotech

08/2024 – 04/2025

Fixed time project. I'm Developing a medical CRM for hormone dosage and patient administration with Next.js, TypeScript, TRPC, Tailwind, Radix, Postgres, etc. Working on the Frontend and Backend aswell.

Mid Level Frontend Developer, Bejamas

06/2023 – 07/2024 | Wroclaw, Poland

I work with JAMStack projects with technologies like Next.js, Typescript, Tailwind CSS, CSS Modules, Headless CMS(Contentful, Sanity, etc.), Serverless, etc. We work on multi-cultural teams on an async communication basis with agencies and companies to deliver world-class products that go blazing fast.

Frontend developer, Webcat

03/2022 – 06/2023 | Medellin, Colombia

I'm working on a migration from a monolithic Java website, to a React - Remix website. Also helping migrating a Vue app from V2 to V3. I performed E2E testing with Cypress to ensure that the flow didn't break on key processes.

Skills

React — Proficient
Core, Hooks, state management, Server Components.

Next.js — Proficient
App/Pages Directory, Server Components, SSG, SSR, ISR, Internationalization, routing, styling, font optimizations, image optimizations, fallback implementation, Typescript, etc.

Tooling — Competent
Hydrogen, Typescript, Cypress, TRPC, ESLint, Webpack, Prettier, Vite, Headless CMS, Vercel, Lighthouse, NPM, Yarn, Conventional commits, Git, CommitLint.

Frontend Developer, Kation Interactive

12/2020 – 03/2022 | Santo Domingo, Dominican Republic

I developed e-commerce, corporative websites, and blogs using, in most cases, Nuxt.js with Tailwindcss as a CSS framework; I also developed internal starter templates to create projects using Laravel Mix, Vite, and Nuxt.

Web Developer, Habitat Web

Ciudad de México, México

I developed landing pages, blogs and do some fixes to old projects, and adding new features to them. In most of the cases, I worked using Vue.js, PHP, Wordpress, HTML, CSS, and Javascript.

Education

Azure Fundamentals (AZ-900), Microsoft

04/2024

This is a Microsoft certification for evaluating basic knowledge of Azure as resource information, governance, advantages, management, properties of the resources, basic Azure tools for optimizing the configuration, and costs.

Web Development, Platzi ⧉

I took several courses related to web development(Javascript, Frontend, Web performance, Vue, React), English, and soft skills.

Intermediate English, FundaUC

Lara, Venezuela

I learned about tenses, grammar and pronunciation, also in that course I improve my reading, speaking, and listening skills.

Mid-level informatic technician, Colegio María Auxiliadora

Lara, Venezuela

I learned the basics of programming, databases and how do computers work.
